Mercury™ T2C
USB 2.0 Type-C Protocol Analyzer

Key Features

• Supports USB Power Delivery 2.0 and 3.0
  Captures all CC events and displays them in the easy-to-understand CATC Trace view

• Supports USB 2.0
  Capable of capturing all USB speeds (LS, FS, HS) including OTG (On-the-Go)

• Portable and Affordable
  Compact, bus-powered system measures 3.0” x 3.6”, weighs under 6 oz.

• 256 MB Recording Memory
  Extend capture time with spool-to-disk recording

• High Impedance probe
  Non-intrusive probe preserves real world signal and timing conditions

• Advanced Triggering
  Isolates important traffic, specific errors or patterns

• Extensive Decodes
  Mass storage, Bluetooth HCI, Hub, PTP/Still Image, Printer, Human Interface Device (HID), Audio, Video, Communication and more

• Hardware Filtering
  Automatically exclude non-essential traffic

• Event Reporting
  Quickly identify and track error rates, abnormal bus activity or timing conditions

The Teledyne LeCroy Mercury T2C adds USB Type-C and Power Delivery 2.0 and 3.0 support to the industry’s smallest and most affordable hardware-based USB 2.0 protocol analyzer. The Mercury T2C combines the de-facto standard CATC Trace™ display, USB class decoding and Power Delivery support in an analyzer that fits in a shirt pocket.

View and Understand USB Protocol

Featuring the industry-leading CATC Trace expert analysis software, the Mercury T2C system provides an easy-to-use display that graphically decodes Power Delivery protocol, in addition to USB 2.0 protocol traffic. With the Standard or Advanced edition, all protocol layers can be expanded to show the underlying transactions and packets. Tooltips help explain protocol events making it easier for non-experts to identify errors.

Real Time Triggering

Isolating specific protocol events with real time triggering is essential to capturing intermittent problems. The Mercury T2C provides sophisticated triggering with drag-and-drop selections for PID type, data patterns, standard requests, errors and bus events. The Mercury T2C features 256 MB of on-board memory and supports spool-to-disk capture for extended recording.

USB Power Delivery Support

The Mercury T2C supports USB Type-C and BMC Power Delivery 2.0 and 3.0 with capture and decode of all Power Delivery packets and Type-C state changes. View all negotiation over the CC wire, including VDMs with current carrying capability, and entry to and exit from Alternate Modes.

USB Power Delivery Support

The Mercury T2C provides many mechanisms to measure and report on USB traffic. The Bus Utilization display shows data, packet length and bus usage by device. Using the Traffic Summary window, users can evaluate statistical reports at a glance or navigate to individual fields. Real time statistics show throughput by endpoint.

**Specifications**

- **Host Requirements**: Windows 7, Windows 8.1 or Windows 10
- **Standard Trigger Events**: Packet Identifier, Token Pattern, Frame Pattern, Device Request, Data Pattern, Bus Conditions, Errors, Transactions, Data Length, Splits
- **Reporting & Statistics**: Packet Level, Transaction Level, Transfer Level, Error Reports
- **Recording Memory Size**: 256 MB
- **Power Consumption**: Idle: 350 mA (typical); Active: 400 mA (typical)
- **Connectors**: USB Type-C
- **Temperature**: Operating: 0°C to 55°C (32°F to 131°F); Non-Operating: -20°C to 80°C (-4°F to 176°F)
- **Humidity**: Operating: 10% to 90% non-condensing
- **Dimensions**: 80 x 90 x 24 mm (3.0” x 3.6” x 1”)
- **Net Weight**: 158g (5.8 oz)
