WaveSurfer 10
Oscilloscopes
1 GHz, 10 GS/s

Key Features

- 1 GHz, 10 GS/s, up to 16 Mpts/ch
- MAUI - Advanced User Interface
  — Designed for Touch
  — Built for Simplicity
  — Made to Solve
- WaveScan - Advanced Search and Find
- LabNotebook Documentation and Report Generation
- 10.4” Touch Screen Display
- Spectrum Analyzer Mode
- Power Analysis Software
- Serial Trigger and Decode
  — I²C, SPI, UART
  — CAN, LIN, FlexRay, SENT
  — Ethernet 10/100BaseT, USB 1.0/1.1/2.0, USB2.0-HSIC
  — Audio (I²S, LJ, RJ, TDM)
  — MIL-STD-1553, ARINC 429
  — MIPI D-PHY, DigRF 3G, DigRF v4
  — Manchester, NRZ
- Advanced Debug Toolkit adds:
  — 10 GS/s on all 4 channels
  — 16 Mpts/ch memory (32 Intlv’d)
  — Sequence Mode Segmented Memory
  — History Mode Waveform Playback
  — 13 Additional Math Operators
  — 2 Math Functions

The WaveSurfer 10 combines the MAUI advanced user interface with powerful waveform processing, in addition to advanced math, measurement and debug tools, to quickly analyze and find the root cause of problems. With a 10.4” touch screen display, high performance hardware, and compact form factor the WaveSurfer 10 is unique among 1 GHz oscilloscopes.

MAUI - A New Wave of Thinking

MAUI is the most advanced oscilloscope user interface. MAUI is designed for touch; all important oscilloscope controls are accessed through the intuitive touch screen. MAUI is built for simplicity; time saving shortcuts and intuitive dialogs simplify setup. MAUI is made to solve; deep set of debug and analysis tools help identify problems and find solutions quickly.

Uncompromised Performance

Many 1 GHz oscilloscopes are available at attractive entry-point prices, however, they are often limited in sample rate, memory or features. The WaveSurfer 10 provides uncompromised 1 GHz performance with up to 10 GS/s per channel and 32 Mpts of memory.

Advanced Debug Toolkit

With the addition of the Advanced Debug Toolkit, the WaveSurfer 10 becomes an unparalleled debug and analysis machine adding 10 GS/s sample rate on 4 channels, 32 Mpts of memory, sequence mode, history mode, 13 additional math functions, and 2 simultaneous math traces.

Capture Debug, Analyze, Document

Easily accessible measurement, math and debug tools, plus a wide variety of serial data protocol decoders, and active probes ensure the WaveSurfer 10 can capture and analyze any type of waveform and simplify the debug process. The LabNotebook tool provides a fast way to save waveforms, save setups and screen images, report results, and view offline.
MAUI is the most advanced oscilloscope user interface developed to put all the power and capabilities of the modern oscilloscope right at your fingertips. Designed for touch; all important oscilloscope controls are accessed through the intuitive touch screen. Built for simplicity; time saving shortcuts and intuitive dialogs simplify setup. Made to solve; a deep set of debug and analysis tools helps identify problems and find solutions quickly.

Oscilloscopes are constantly evolving to meet the rapidly changing test and measurement needs of today’s cutting edge designs. Additional complexity and capabilities are introduced with each new feature, and in some cases when capabilities of other instruments like a protocol analyzer, function generator or logic analyzer are added. With all this added capability the oscilloscope becomes complex and cumbersome to use. The traditional user interface consisting of knobs, buttons, soft keys and nested menus is unmanageable and more buttons are typically added to access the new functionality.

MAUI solves the complexity problem. MAUI eliminates the overwhelming number of buttons and knobs providing an intuitive user interface that is designed for touch, built for simplicity and made to solve without sacrificing any features or cutting edge test capabilities.

Designed for Touch

MAUI is designed for touch. All important controls for vertical, horizontal and trigger are always one touch away. Touch the waveform to position and drag a box around it to zoom in for more details. Position cursors, configure measurements and interact with tables all through simple touch operation.
Built for Simplicity

MAUI is built for simplicity. Basic waveform viewing and measurement tools as well as advanced math and analysis capabilities are seamlessly integrated in a single user interface. Time saving shortcuts and intuitive dialogs simplify setup and shorten debug time.

Made to Solve

MAUI is made to solve. Measure all aspects of a waveform to identify problems. Debug with a large set of time saving tools to find the cause of problems. Solve problems fast with powerful analysis tools.
Embedded Controller Design and Debug
Save time when working with embedded controllers by adding high-performance mixed signal capability with the WaveSurfer 10. Capture digital signals up to 250 MHz with up to 10 Mpts/Ch memory, 1 GS/s and 18 channels. Quickly and easily isolate specific serial data events with I^2C, SPI, UART, RS-232, USB 1.0/1.1/2.0, USB2-HSIC, 10/100Base T ENET, Audio (I2S, LJ, RJ, TDM), MIL-STD-1553, ARINC 429, MIPI D-PHY, DigRF, CAN, CAN FD, LIN, FlexRay, SENT, Manchester, and NRZ trigger and decode options.

WaveScan Advanced Search and Find Tool
Quickly search waveforms for runts, glitches or other anomalies with WaveScan.

LabNotebook Documentation and Report Generation Tool
Save all results and data with a single button press and create custom reports with LabNotebook.

Pass/Fail Mask Testing
Built-in masking testing quickly identifies problems and marks the location. A history of the pass/fail results can be displayed on the screen.

Enhanced Resolution
The enhanced resolution (ERES) feature improves vertical resolution of the oscilloscope resulting in cleaner traces and the ability to see more signal details. Up to 3 bits of ERES can be applied.

Advanced Math and Measure
Use automatic measurement parameters with statistics and histicons as well as math functions to understand every waveform detail.

WaveStream Fast Viewing Mode
WaveStream provides a vibrant, intensity graded (256 levels) display with a fast update to closely simulate the look and feel of an analog oscilloscope.
**LabNotebook Documentation Tool**
LabNotebook is a one-button tool to save and restore waveforms, measurements and settings without navigating multiple menus. Custom reports can be created and easily shared; saved waveforms can be measured and analyzed later both on the oscilloscope or offline using the WaveStudio PC Utility.

**WaveStudio Offline Analysis Tool**
WaveStudio is a fast and easy way to analyze acquired waveforms offline. Offline tools include x and y axis cursors for quick measurements and 21 built-in automatic measurements for more precise and accurate results. WaveStudio can also connect to the oscilloscope for direct data transfer to the PC. Data saved with LabNotebook can be shared with others using WaveStudio for easy collaboration.

**Advanced Probe Interface**
The advanced active probe interface gives tremendous flexibility for measuring high voltages, high frequencies, currents, or differential signals.

- **High Impedance Active Probes**
- **High Bandwidth Differential Probes**
- **High Voltage Differential Probes**
- **High Voltage Passive Probes**
- **Current Probes**
The WaveSurfer 10M includes the Advanced Debug Toolkit software which makes it an unparalleled debug and analysis machine. The high sample rate of 10 GS/s on all 4 channels, 32 Mpts of memory, sequence mode segmented memory, history mode waveform playback, 13 additional math functions, and 2 simultaneous math traces, all included in this powerful debug package, enable the WaveSurfer 10M to perform advanced analysis on long captures with 10x oversampling to find the root cause of problems.

A With 10 GS/s and 16 Mpts per channel every detail of a signal will be captured and displayed. In 4 channel operation 1.6ms of data can be captured at full sample rate, in 2 channel mode, 3.2ms, to ensure no detail or anomaly is missed.

B Configure and view 2 simultaneous math traces, each math trace can perform dual math operation enabling complex analysis and faster troubleshooting.

C 13 additional math operators are added to the already wide variety of math functions to allow deeper analysis. Included additional functions are absolute value, average (summed or continuous), envelope, enhanced resolution, exp (base e), exp (base 10), floor, invert, log (base e), log (base 10), reciprocal, roof, and trend.

D Histicons display the statistical distribution of each measurement parameter. Anomalies in measurement data can quickly be seen and then analyzed to find the root cause of problems faster. Histicons are auto-scaled so outliers can never be missed.
Advanced Waveform Capture with Sequence Mode

Use Sequence mode to store up to 5,000 triggered events as “segments” into memory. This can be ideal when capturing many fast pulses in quick succession or when capturing events separated by long time periods. Sequence mode provides timestamps for each acquisition and minimizes dead-time between triggers to less than 1 μs. Combine Sequence mode with advanced triggers to isolate rare events over time and analyze afterwards.

History Mode Waveform Playback

Scroll back in time using History Mode to view previous waveforms and isolate anomalies. Use cursors and measurement parameters to quickly find the source of problems. History mode is always available with a single button press, no need to enable this mode and never miss a waveform.

Go Back in Time to Identify the Source of a Problem
Teledyne LeCroy’s versatile WaveSurfer 10 mixed signal oscilloscope combines the powerful WaveSurfer 10 with the flexibility of digital inputs using the MS-250. In addition, the many triggering and decoding options turn the WaveSurfer 10 into an all-in-one analog, digital, and serial data trigger, acquisition, and debug machine.

**High-performance Mixed Signal Capabilities**

Embedded controller design and debug involves capturing and viewing a number of different types of signals. These signals are typically a mix of analog, digital, and serial data waveforms from a combination of analog sensors, microcontrollers and peripheral devices. With the ability to capture digital signals with speeds up to 250 MHz and long memory of 10 Mpts/Ch the WaveSurfer 10 provides unmatched mixed signal performance. The WaveSurfer 10 is the ideal tool for testing embedded systems with 8-bit microcontrollers or slower digital signals. With 18 digital inputs each with 250 MHz maximum input frequency and 10 Mpts/Ch memory, the WaveSurfer 10 is an outstanding value and provides a complete set of tools for embedded system testing.

**Extensive Triggering**

The WaveSurfer 10 has extensive digital trigger capabilities. Normal oscilloscope triggers will operate on digital inputs. Cross-pattern triggering allows for simple or complex trigger patterns to be setup with any combination of analog and digital channels. Event triggering can be configured to arm on an analog signal and trigger on a digital pattern.

**Quick Mixed Signal Setup, Easy-to-use**

Unlike a traditional Logic Analyzer, the WaveSurfer 10 is easy to use. A simple connection links the oscilloscope with the digital inputs so users can start viewing signals and begin debugging quickly. In addition, all standard oscilloscope tools are readily accessible. Signal debug is simple, using standard oscilloscope tools, such as cursors, measurement parameters, and zooming.
Supported Serial Data Protocols
• I²C, SPI, UART
• CAN, CAN FD, LIN, FlexRay™, SENT
• Ethernet 10/100BaseT, USB 1.0/1.1/2.0, USB 2.0-HSIC
• Audio (I²S, LJ, RJ, TDM)
• MIL-STD-1553, ARINC 429
• MIPI D-PHY, DigRF 3G, DigRF v4
• Manchester, NRZ

Debugging serial data busses can be confusing and time consuming. The serial data and decode options for WaveSurfer 10 provide time saving tools for serial bus debug and validation.

**Powerful Serial Data Triggers**
The serial data trigger will quickly isolate events on a bus eliminating the need to set manual triggers and hoping to catch the right information. Trigger conditions can be entered in binary or hexadecimal formats and conditional trigger capabilities even allow triggering on a range of different events.

**Intuitive, Color-Coded Decode Overlay**
Protocol decoding is shown directly on the waveform with an intuitive, color-coded overlay and presented in binary, hex or ASCII. Decoding on the WaveSurfer 10 is fast even with long memory and zooming in to the waveform shows precise byte by byte decoding.

**Table Summary and Search/Zoom**
To further simplify the debug process all decoded data can be displayed in a table below the waveform grid. Selecting an entry in the table with the touch screen will display just that event. Additionally, built-in search functionality will find specific decoded values.

View decoded protocol information on top of physical layer waveforms and trigger on protocol specific messages.
Simple Frequency Domain Analysis

Get better insight to the frequency content of any signal with use of the Spectrum Analyzer mode on the WaveSurfer 10. This mode provides a spectrum analyzer style user interface with controls for start/stop frequency or center frequency and span. The unique peak search automatically labels spectral components and presents frequency and level in an interactive table. Utilize up to 20 markers to automatically identify harmonics and monitor how the spectrum changes over time using the spectrogram which can display a 2D or 3D history of the frequency content.

Power Analyzer Automates Switching Device Loss Measurements

Quickly measure and analyze the operating characteristics of power conversion devices and circuits with the Power Analyzer option. Critical power switching device measurements, control loop modulation analysis, and line power harmonic testing are all simplified with a dedicated user interface and automatic measurements. Areas of turn-on, turn-off, and conduction loss are all identified with color-coded waveform overlays for faster analysis.

Power Analyzer provides quick and easy setup of voltage and current inputs and makes measurements as simple as the push of a button. Tools are provided to help reduce sources of measurement errors and the measurement parameters provide details of single cycle or average device power losses.

Beyond the advanced power loss measurement capabilities, the Power Analyzer modulation analysis capabilities provide insight to understand control loop response to critical events such as a power supply’s soft start performance or step response to line and load changes. The Line Power Analysis tool allows simple and quick pre-compliance testing to EN 61000-3-2.
### Analog - Vertical
- **Bandwidth (@ 50Ω)**: 1 GHz
- **Rise time**: 350 ps
- **Input Channels**: 4
- **Resolution**: 8 bits
- **Sensitivity**: 2 mV/div–10 V/div (1 MΩ); 2 mV/div–1 V/div (50 Ω)
- **DC Gain Accuracy**: ±1.0% of full scale (typical); ±1.5% of full scale ≥ 10 mV/div (warranted)
- **BW Limit**: 20 MHz, 200 MHz
- **Maximum Input Voltage**: 50 Ω: 5 Vrms, 1 MΩ: 250 V max. (DC + Peak AC ≤10 kHz)
- **Input Coupling**: AC, DC, GND (DC and GND for 50 Ω)
- **Input Impedance**: 1 MΩ || 16 pF, or 50 Ω

### Analog - Acquisition
- **Sample Rate (Single-shot)**: 5 GS/s (10 GS/s Interleaved)
- **Sample Rate (Repetitive)**: 50 GS/s
- **Record Length**: 10 Mpts/Ch (all channels), 20 Mpts (interleaved)
- **Capture Time**: Up to 2.0 ms at full sample rate on all four channels
- **Acquisition Modes**: Real Time, Roll, RIS (Random Interleaved Sampling), WaveStream (Fast Viewing Mode).
- **Timebase Range**: 200 ps/div–1000 s/div (Roll Mode available at ≥ 100 ms/div and ≤ 5 MS/s)
- **Timebase Accuracy**: ± 5 ppm @ 25 °C (typical) (± 10 ppm @ 5–40 °C)

#### Digital - Vertical and Acquisition (with MS-250 Mixed Signal Option)
- **Input Channels**: 18 (D0-D17)
- **Input Impedance**: 100 kΩ || 5.0 pF
- **Maximum Input Voltage**: ±30 V non-destruct
- **Threshold Groupings**: D0–D8, D9–D17
- **Threshold Selections**: TTL, ECL, CMOS, PECL, LVDS, User Defined
- **Sample Rate**: 1 GS/s
- **Record Length**: 10 Mpts/Ch
- **Minimum Detectable Pulse Width**: 2 ns
- **Maximum Input Frequency**: 250 MHz

#### Trigger System
- **Modes**: Normal, Auto, Single, and Stop
- **Sources**: Any input channel, External, Ext/10, or line; slope and level unique to each source (except for line trigger)
- **Coupling**: DC, AC, HFRej, LFRej
- **Pre-trigger Delay**: 0-100% of full scale
- **Post-trigger Delay**: 0-10,000 Divisions
- **Hold-off**: 1 ns to 20 s or 1 to 1,000,000,000 events
- **Internal Trigger Level Range**: ±4.1 div from center
- **External Trigger Level Range**: EXT/10 ±4V, EXT ±400 mV
- **Trigger Types**: Edge, Glitch, Width, Logic (Pattern), TV (NTSC, PAL, SECAM, HDTV–720p, 1080i, 1080p), Run, Slow Rate, Interval (signal or Pattern), Dropout, Qualified (State or Edge)
- **Probes**: Standard Probes: One PP011 (5 mm) per channel
- **Probing System**: BNC and Teledyne LeCroy ProBus for Active voltage, current and differential probes

### Display System
- **Display Size**: Color, 10.4” TFT-LCD Touch Screen
- **Display Resolution**: SVGA: 800 x 600 pixels

### Measure, Zoom and Math Tools
#### Measurement Parameters
Up to 6 of the following parameters can be calculated at one time on any waveform: Amplitude, Area, Base (Low), Delay, Parameters Duty, Fall Time (90%–10%), Rise Time (80%–20%), Frequency, Maximum, Mean, Minimum, Overshoot+, Overshoot-, Period, Peak-Peak, Phase, Rise Time (10%–90%), Rise Time (20%–80%), RMS, Skew, Standard Deviation, Top (High), Width+, Width-. Measurements can be gated.

#### Zooming
- **Use front panel QuickZoom button, or use touch screen or mouse to draw a box around the zoom area.**

#### Math Functions
Functions include Sum, Difference, Product, Ratio, Derivative, DeskeW, Integral, Rescale (change scale and units), Square, Square Root, Zoom and FFT (up to 1 Mpts with power spectrum output and rectangular, VonHann, and FlatTop windows). 1 math function may be defined at a time, 2 functions may be chained together.

### WaveSurfer 10M and Advanced Debug Toolkit Additional Capabilities (Optional)
- **Sample Rate (Single-shot)**: 10 GS/s on all 4 channels
- **Record Length**: 16 Mpts/ch (32 Interleaved)
- **Additional Acquisition Mode**: Sequence (Segmented Memory up to 5,000 segments with 1 μs intersegment time)
- **Additional Math Functions**: Absolute value, Average (summed or continuous), Envelope, Enhanced Resolution, Exp (base e), Exp (base 10), Floor, Invert, Log (base e), Log (base 10), Reciprocal, Roof and Trend. 2 dual operator math functions may be defined at a time.
- **Additional Measurement Capabilities**: Histicons for measurement distribution analysis
- **Additional Debug Tools**: History mode waveform playback

### Connectivity
- **Ethernet Port**: 10/100/1000Base-T Ethernet interface (RJ-45 connector)
- **USB Host Ports**: (5) USB Ports
- **GPIB Port (Optional)**: Supports IEEE – 488.2 (Optional External Adapter)
- **External Monitor Port**: Standard 15-pin D-Type SVGA-compatible DB-15 connector
- **Remote Control**: Via Windows Automation, or via Teledyne LeCroy Remote Command Set
- **Network Communication Standard**: VXI-11 or VICP, LXI Class C Compliant

### Physical
- **Dimensions (HWD)**: 260 mm x 340 mm x 152 mm
- **Net Weight**: 7.26 kg, (16.0 lbs.)

**Included with Standard Configurations**
- +10 Passive Probe (Total of 1 Per Channel), Protective Front Cover, Getting Started Guide, Commercial NIST Traceable Calibration with Certificate, Power Cable for the Destination Country, 3-year Warranty

**General Accessories**
- Soft Carrying Case: WS10-SOFTCASE
- Hard Carrying Case: WS10-HARDCASE
- Rack Mount Accessory: WS10-RACK

**Software Options**
- Advanced Debug Toolkit Option: WS10-ADT
- Power Analyzer Option: WS10-PWR
- Spectrum Analyzer Option: WS10-SPECTRUM

**Local Language Overlays**
- German Front Panel Overlay: WS10-FP-GERMAN
- French Front Panel Overlay: WS10-FP-FRENCH
- Italian Front Panel Overlay: WS10-FP-ITALIAN
- Spanish Front Panel Overlay: WS10-FP-SPANISH
- Japanese Front Panel Overlay: WS10-FP-JAPANESE
- Korean Front Panel Overlay: WS10-FP-KOREAN
- Chinese (Tm) Front Panel Overlay: WS10-FP-CHINES-TM
- Chinese (Simp) Front Panel Overlay: WS10-FP-CHINES-SI
- Russian Front Panel Overlay: WS10-FP-RUSSIAN

**Mixed Signal Solutions**
- 500 MHz, 18 Channels, 2 GS/s, 50 Mpts/ch Mixed Signal Oscilloscope Option: MS-500
- 250 MHz, 36 Ch, 1 GS/s, 25 Mpts/ch (500 MHz, 18 Ch, 2 GS/s, 50 Mpts/ch Interleaved) Mixed Signal Option: MS-500-36
- 250 MHz, 18 Channels, 1 GS/s, 10 Mpts/ch Mixed Signal Oscilloscope Option: MS-250

**Mixed Signal Accessories**
- Extra Large Gripper Probe Set, Includes 22 probes: PK400-0
- Large Gripper Probe Set for 0.10 Inch (2.54 mm): PK400-1
- Pin Pitch. Includes 10 Probes with Color-coded Leads: PK400-2
- Medium Gripper Probe Set for 0.04 Inch (1.0 mm): PK400-3
- Small Gripper Probe Set for 0.008 Inch (0.2 mm): PK400-4
- 18-pin 3M Interface Cable MSO-3M (Mates with 3M Part Number 2520-6002): MSO-3M
- 36 Channel Mictor Connector (Includes 1 MSO-MICTOR-SHROUD): Mictor

**Serial Data Options**
- ARINC 429 Symbolic Decode Option: WS10-ARINC429bus DSymbolic
- AudioBus Trigger and Decode Option for I2S, LL, RJ, and TDM: WS10-Audiobus TD
- CAN Trigger and Decode Option: WS10-CANbus TD
- CAN FD Trigger and Decode Option: WS10-CANFDbus TD
- D-PHY Decode Option: WS10-DPHYbus D
- DigRF 3G Decode Option: WS10-DigRF3Gbus D
- DigRF v4 Decode Option: WS10-DigRFV4bus D
- ENET Decode Option: WS10-ENETbus D
- FlexRay Trigger and Decode Option: WS10-FlexRaybus D
- I²C, SPI and UART Trigger and Decode Option: WS10-EMB
- I²C Bus Trigger and Decode Option: WS10-I²Cbus TD
- LIN Trigger and Decode Option: WS10-LINbus TD
- Manchester Decode Option: WS10-Manchesterbus D
- MIL-STD-1553 Trigger and Decode Option: WS10-1553 TD
- NRZ Decode Option: WS10-NRZbus D
- SENT Decode Option: WS10-SENTbus D
- SPI Bus Trigger and Decode Option: WS10-SPIbus TD
- UART and RS-232 Trigger and Decode Option: WS10-UART-RS232bus TD
- USB 2.0 Decode Option: WS10-USB2bus D
- USB2-HSIC Decode Option: WS10-USB2-HSICbus D

**Probes**
- 500 MHz Passive Probe 10:1, 10 MΩ: PP011
- 700 V, 15 MHz High-Voltage Differential Probe: AP031
- 200 MHz, 3.5 pF, 1 MΩ Active Differential Probe: ZD200
- 1 GHz, 1.0 pF, 1 MΩ Active Differential Probe: ZD1000
- Deskew Calibration Source for CP031 and CP030: DCS015
- 30 A, 50 MHz Current Probe – AC/DC, 30 Arms, 50 Apeak Pulse: CP030
- 30 A, 50 MHz High Sensitivity Current Probe – AC/DC, 30 Arms, 50 Apeak Pulse: CP030A
- 30 A, 100 MHz Current Probe – AC/DC, 50 Arms, 50 Apeak Pulse: CP031A
- 30 A, 100 MHz High Sensitivity Current Probe – AC/DC, 50 Arms, 50 Apeak Pulse: CP031A
- 150 A, 10 MHz Current Probe – AC/DC, 150 Arms, 50 Apeak Pulse: CP150
- 500 A, 2 MHz Current Probe – AC/DC, 500 Arms, 700 Apeak Pulse: CP500
- 1,400 V, 100 MHz High-Voltage Differential Probe: ADP305
- 1,400 V, 20 MHz High-Voltage Differential Probe: ADP300
- 1 Ch, 100 MHz Differential Amplifier with Precision Voltage Source: DA1855A
- 1.5 GHz, 0.9 pF, 1 MΩ High Impedance Active Probe: ZS1500
- 250 MHz, 36 Ch, 1 GS/s, 25 Mpts/ch Interleaved: ZS1500-QUADPAK
- High Impedance Active Probe: Z1500Q-QUADPAK
- 1 GHz, 0.9 pF, 1 MΩ High Impedance Active Probe: Z1500Q-QUADPAK
- 25 MHz High Voltage Differential Probe: HVD3102
- 80 MHz High Voltage Differential Probe with 5m cable: HVD3106-SM
- 120 MHz High Voltage Differential Probe: HVD3106

**Customer Service**

Teledyne LeCroy oscilloscopes and probes are designed, built, and tested to ensure high reliability. In the unlikely event you experience difficulties, our digital oscilloscopes are fully warranted for three years and our probes are warranted for one year. This warranty includes:
- No charge for return shipping
- Long-term 7-year support
- Upgrade to latest software at no charge

Local sales offices are located throughout the world. Visit our website to find the most convenient location.
