

## CAPTURE EVERY DETAIL

# **Highest** Resolution

# Bigger Display

## More Capability

Providing **12 bits all the time**, a **bigger display**, **smaller footprint**, and **more capability**, the **HD06000B captures every detail**.

## 12 bits all the time.

Teledyne LeCroy high definition 12-bit oscilloscopes use unique HD4096 technology to provide superior and uncompromised measurement performance:

- 12-bit ADCs with high sample rates
- High signal-to-noise amplifiers
- Low noise system architecture (to 1 GHz)

Oscilloscopes with HD4096 technology have higher resolution than conventional 8-bit oscilloscopes (4096 vs. 256 vertical levels) and low noise for uncompromised measurement performance. The 12-bit ADCs support capture of fast signals at oscilloscope bandwidth ratings up to 1 GHz, while Enhanced Sample Rate to 10 GS/s ensures the highest measurement accuracy and precision. The high performance input amplifiers deliver pristine signal fidelity, and the low-noise system architecture provides an ideal signal path to ensure that signal details are delivered accurately to the oscilloscope display – 16x closer to perfect.

### 16x Closer to Perfect

#### **16x more resolution**

HD4096 technology provides 12 bits of vertical resolution — 16x more resolution than conventional 8-bit oscilloscopes. The 4096 discrete vertical levels reduce the quantization error compared to 256 vertical levels. This improves the accuracy and precision of the signal capture and increases measurement confidence.

## **EXPERIENCE THE DIFFERENCE**

Experience HD4096 accuracy, detail and precision and never use an 8-bit oscilloscope again. Whether the application is general purpose design and debug, high precision analog sensors, power electronics, automotive electronics, mechatronics or other specialized applications, the HD4096 technology provides unsurpassed confidence and measurement capabilities.

#### **Clean, crisp waveforms**

When compared to waveforms acquired and displayed using conventional 8-bit oscilloscopes, waveforms captured with HD4096 12-bit technology are dramatically crisper and cleaner, and are displayed more accurately. Once you see a waveform acquired with HD4096 technology, you will not want to go back to using a conventional 8-bit oscilloscope.

#### More signal details

16x more resolution provides more signal detail. This is especially helpful for analyzing wide dynamic range signals where very small amplitude signal details must be viewed. 12-bit acquisitions combined with the oscilloscope's vertical and horizontal zoom capabilities provide unparalleled insight into system behaviors and problems.

#### **Unmatched measurement precision**

HD4096 technology delivers measurement precision several times better than conventional 8-bit oscilloscopes. Higher oscilloscope measurement precision results in better ability to assess corner cases and design margins, perform root cause analysis, and create the best possible solution for any discovered design issue.

Clean, crisp waveforms | Thin traces show the actual waveform with minimal noise interference.

More signal details | Waveform details can now be clearly seen on an HD4096 12-bit oscilloscope.

Unmatched measurement precision | Measurements are more precise and not affected by quantization noise.

## **BIGGER DISPLAY, SMALLER FOOTPRINT, MORE BENCH SPACE**

6.7"

#### Capture every detail with the HDO6000B's bigger 15.6" display.

#### **Bigger display**

With a 15.6" display and 1920x1080 resolution, the HDO6000B allows you to capture more detail. Connect to a second monitor, and view the extended desktop in glorious 4K resolution.

#### **Smallest footprint**

At only 6.7" deep and 25% thinner than competitive products, the HDO6000B is the sleekest instrument in the market.

#### Most bench space

The HDO6000B occupies less bench space than the competitive products, allowing you to spread out test circuits and probes to help focus on solving problems.

## MORE CAPABILITY, INCREASED PRODUCTIVITY

#### **MAUI Studio**

Unleash the power of a Teledyne LeCroy oscilloscope anywhere, using a PC with MAUI Studio. Work from anywhere while having the full functionality of an oscilloscope at your fingertips. Collaborate with ease by giving everyone access to the same software options to use for offline analysis.

#### **Spectrum Analysis**

Spectrum-Pro-2R provides the most flexible spectral analysis with a logarithmic scale and drag-and-drop spectrum traces. Leverage long acquisition memory to perform analysis down to 1 Hz with resolution bandwidth up to 100 mHz.

#### **QualiPHY Compliance Testing**

The QualiPHY framework provides an automated and easy-to-use compliance testing platform for a number of serial data standards. QualiPHY reduces time and effort by guiding you through each setup and fully document all results.

HDO6000B 12-bit oscilloscopes deliver 4 analog channels, 3-phase power analysis software, and high performance probes for inverter subsection, power system and control testing.

#### **Flexible Power Calculations**

Analyze short or long acquisitions. The mean value Numerics table summarizes static performance, while per-cycle Waveforms help you understand dynamic behaviors. Use Zoom+Gate to isolate and correlate power system behaviors to control system activity during time periods as short as a single device switching cycle.

#### **Comprehensive probing**

HVD series high voltage differential probes have 65 dB CMRR at 1 MHz with upto 0.35% gain accuracy, the widest voltage ranges, and up to 6 kV commonmode rating. Connect current probes or use your own transducers with the programmable CA10 current sensor adapter to create a customized "probe". HVFO and DL-HCM probes are ideal for gate drive probing.

#### **Two-wattmeter Support**

Both 1-phase and 3-phase measurements are supported. The two-wattmeter measurement method allows 3-phase power measurements to be made using two voltage and two current signals; therefore, 3-phase measurements can be made using 4 channels instead of 6.

Want 8 or 16 channels? The WaveRunner 8000HD has you covered. Learn more at www.teledynelecroy.com/wr8000hd

## **AUTOMOTIVE ELECTRONICS**

HDO6000B 12-bit oscilloscopes provide a wide range of probing solutions, compliance testing, and debug software to best address the specific test needs of the automotive industry.

#### Ideal probe for 48 V systems

The DL-HCM, 60 V Common Mode Differential Probes are the ideal probes for 48 V battery-powered motor and drive systems. When combined with HD06000B 12-bit oscilloscopes, the DL10-HCM provides 1 GHz bandwidth with the highest accuracy, the best CMRR, and lowest noise.

#### **Superior IVN tools**

Unique capabilities that build on our legacy serial data trigger and decode provide the most complete in-vehicle networking (IVN) debug and validation. Cover all aspects of physical layer 10Base-T1S and 100Base-T1 Automotive Ethernet compliance testing and debug.

#### **EMI/EMC pre-compliance test**

12-bit resolution for spectral analysis provides more insight. Specialized EMC/EMI pulse parameters provide measurement flexibility. Support for all relevant electrical and magnetic field units of measure. Capability to measure sub-1 Hz magnetic field strengths.

HDO6000B 12-bit oscilloscopes' high resolution and long memory let you validate and debug all aspects of power supply, delivery and consumption – for complete confidence.

#### **Accurate PDN measurements**

Make sensitive measurements like rail collapse characterization with total confidence thanks to HD06000B's high dynamic range and 0.5% gain accuracy. Its HD4096 architecture means an exceptionally low noise floor, for easily pinpointing noise sources.

#### **Specialized power probes**

Combine HDO6000B with the RP4030 Power Rail Probe for unsurpassed insight into PDN behavior. The variety of probe tips ensures easy connectivity, and its low loading characteristics minimize disruption to the device under test.

#### **Spectrum Analysis**

Narrow in on interference causing problems in PDNs by enabling unique debug features such as spectral background removal on Spectrum-Pro-2R to eliminate spurious interference from environmental or other sources.

HDO6000B 12-bit oscilloscopes acquire long records at the highest resolution for the most comprehensive deeply embedded computing system analysis (analog, digital, serial data, and sensor).

#### **Clock Analysis**

Enable better analysis of clock sources by combining HDO6000B's all-instance measurements, to measure every clock edge, with the ability to capture long records and build statistics faster. Then, trend values over time or build a statistical distribution.

#### **Protocol Analysis**

HD06000B uses powerful conditional DATA triggering to trigger on protocol elements or specific DATA patterns. Highly adaptable ERROR frame triggering helps isolate protocol errors while Search & Zoom helps correlate protocol events to embedded signals.

#### **Power Management Tools**

HDO6000B supports decoding of I<sup>2</sup>C, SPMI, SMBus, and PMBus protocols to provide insight into dedicated power manangement serial protocols and speeding up test and debug of designs.

## HD06000B OSCILLOSCOPES AT A GLANCE

#### **Key Attributes**

- 1. 15.6" 1920 x 1080 capacitive touchscreen display
- 2. 4 analog input channels
- 3. ProBus input supports every Teledyne LeCroy probe
- **4.** MAUI with OneTouch user interface for intuitive and efficient operation
- 5. Q-Scape multi-tab display architecture
- 6. Up to 250 Mpts of acquisition memory
- **7.** HD4096 technology 12 bits all the time
- 8. Buttons/indicators color-coded to associated waveform on display

- 9. Use cursors and adjust settings without opening a menu
- **10.** Mixed Signal capability with 16 integrated digital channels
- 11. 6 USB 3.1 ports (2 front, 4 side)
- **12.** HDMI and DisplayPort supports 4K (4096 x 2304) external monitor
- 13. Removable SSD (standard)
- 14. Reference Clock Input/Output for connecting to other equipment
- **15.** USBTMC over USB 2.0 for data offload
- **16.** WaveSource Arbitrary Function Generator

## **POWERFUL, DEEP TOOLBOX**

#### **Our heritage**

Teledyne LeCroy's 50+ year heritage is in processing long records to extract meaningful insight. We invented the digital oscilloscope and many of the additional waveshape analysis tools.

#### Our obsession

Our tools and operating philosophy are standardized across much of our product line. This deep toolbox inspires insight; and your moment of insight is our reward.

#### **Our invitation**

Our Periodic Table of Oscilloscope Tools explains the toolsets that Teledyne LeCroy has deployed in our oscilloscopes. Visit our interactive website to learn more about them. teledynelecroy.com/tools

## PROBES

#### Teledyne LeCroy offers an extensive range of probes to meet virtually every probing need.

60 V Common Mode Differential Probes	The ideal probes for lower voltage GaN power conversion measurement with the highest accuracy, best CMRR, and
DL02-HCM, DL05-HCM, DL10-HCM	lowest noise. Up to 1 GHz.
ZS Series High Impedance Active Probes ZS1000, ZS1500	1 to 4 GHz models. High signal fidelity and low circuit loading (<1 pF tip capacitance). ±8 V dynamic range, ±12 V offset.
Differential Probes (200 MHz – 1.5 GHz)	Wide dynamic range, low loading and excellent noise performance. From 200 MHz to 1.5 GHz. Specialty AP033 provideo 10x gain and high CMPR
ZD200, ZD500, ZD1000, ZD1500	provides 10x gain and high CMRR.
Active Voltage/Power Rail Probe	2 to 4 GHz bandwidth, ±60 V offset, ±800 mV dynamic range. High DC input impedance and low noise/attenuation for power
RP2060, RP4060	rail probing.
High Voltage Optically Isolated Probes	Up to 1 GHz. Ideal for GaN and SiC devices. Highest accuracy, most bandwidth, wide range of voltages, optical isolation.
DL03-ISO, DL07-ISO, DL10-ISO, HVF0108	S°
HVD Series High vVoltage Differential Probes	1 kV, 2 kV and 6 kV CAT safety rated models. Widest differential voltage ranges, exceptional CMRR, low noise, 1% gain accuracy
HVD3102A, HVD3106A (1 kV) HVD3206A, HVD3220 (2 kV) HVD3605A (6 kV)	
High Voltage Passive Probes	1 kV to 6 kV ratings. Provide ground-referenced high voltage measurements in a wide range of applications.
HVP120, РРЕ6КV-А	
Current Probes	For AC, DC, and impulse current measurements. Utilizes
CP030B, CP030-3M, CP031, CP031A CP150B, CP150-6M CP500, DCS025	combination of Hall effect and transformer technology. Up to 500A, up to 100 MHz.
Probe and Current Sensor Adapters	Change between the different Teledyne LeCroy Oscilloscope input types or provide simple interface to 3rd-party probes.
TPA10, CA10

Trigger Types			
Edge	Triggers when signal meets slope (po	ositive, negative, or either) and level co	ondition.
Width	Triggers on positive or negative glitch Minimum width: 1.5 ns, maximum wi	dth: 20 s	
Glitch	Triggers on positive or negative glitch Minimum width: 1.5 ns, maximum wi		
Window	Triggers when signal exits a window		
Pattern	Logic combination (AND, NAND, OR, N be high, low, or don't care. The high ar pattern.	NOR) of 5 inputs (4 channels and externed low level can be selected independent	nal trigger input). Each source can ently. Triggers at start or end of
Runt	Trigger on positive or negative runts de	fined by two voltage limits and two time	limits. Select between 1 ns and 20 ns.
Slew Rate	Trigger on edge rates. Select limits fo		
nterval	Triggers on intervals selectable betw		
Dropout	Triggers if signal drops out for longer		20 s.
Measurement	Select from a large number of measu limits.		
Multi-stage: Qualified	Triggers on any input source only if a sources is selectable by time or even	ts (Note: event B pattern trigger cann	ot include analog channels).
Multi-stage: Qualified First	In Sequence acquisition mode, trigge satisfied in the first segment of the a event B pattern trigger cannot include	rs repeatably on event B only if a defined	ned pattern, state or edge (event A) is
Multi-Stage: Cascade (Sequence) Trigger, Capability	Arm on "A" event, then Trigger on "B" event	event. Or Arm on "A" event, then Qualit	y on "B" event, and Trigger on "C"
Multi-Stage: Cascade (Sequence)	Cascade A then B: Edge, Window, Pat	tern (Logic) Width Glitch Interval Dro	poout, or Measurement
Trigger, Types	Measurement can be on Stage Bonly Width, Glitch, Interval, Dropout, or Me C: Edge, Window, Pattern (Logic)	. Cascade A then B then C (Measurer	nent): Edge, Window, Pattern (Logic)
Multi-Stage: Cascade (Sequence)	Holdoff between A and B or B and C i	s selectable by time or number of eve	nts. Measurement trigger selection
Trigger, Holdoff	as the last stage in a Cascade preclu

3-year warranty; calibration recommended annually. Optional service programs include extended warranty, upgrades, and calibration services.

#### WaveSource Arbitrary Waveform Generator (all models)

General	
Max Frequency	25 MHz
Sample Rate	125 MS/s
Arbitrary Waveform Length	16 kpts
Output Amplitude	4 mVpp - 6 Vpp ( HiZ); 2 mVpp - 3 Vpp (50 Ω)
Waveform Types	Sine, Square, Pulse, Triangle, DC, Noise, Arbitrary Waveform

#### Frequency Specification

Sine	1 μHz - 25 MHz
Square/Pulse	1 µHz - 10 MHz
Triangular	1 µHz - 300 KHz
DC Output	±3 V (HiZ); ±1.5 V (50 Ω)
Noise	25 MHz (-3 dB)
Arbitrary Waveform	1 µHz - 3 MHz

## **ORDERING INFORMATION**

Product Description HDO6000B Oscilloscopes	Product Code
350 MHz, 4 Ch, 12 Bits, 10 GS/s, 50 Mpts/Ch	HD06034B
High Definition Oscilloscope	
with 15.6" 1920x1080 capacitive touch screen	
and 4K extended desktop	
500 MHz, 4 Ch, 12 Bits, 10 GS/s, 50 Mpts/Ch	HD06054B
High Definition Oscilloscope	
with 15.6" 1920x1080 capacitive touch screen	
and 4K extended desktop	
1 GHz, 4 Ch, 12 Bits, 10 GS/s, 50 Mpts/Ch	HD06104B
High Definition Oscilloscope	
with 15.6" 1920x1080 capacitive touch screen	
and 4K extended desktop	

#### HDO6000B-MS Mixed Signal Oscilloscopes

500 MHz, 4 Ch, 12 Bits, 10 GS/s, 50 Mpts/Ch	HDO6054B-MS
High Definition Mixed Signal Oscilloscope	
with 15.6" 1920x1080 capacitive touch screen	
and 4K extended desktop	
1 GHz, 4 Ch, 12 Bits, 10 GS/s, 50 Mpts/Ch	HDO6104B-MS
High Definition Mixed Signal Oscilloscope	
with 15.6" 1920x1080 capacitive touch screen	

#### Included with Standard Configurations (HDO6000B and HDO6000B-MS)

÷10 Passive Probe (Qty. 4), Getting Started Guide, Anti-virus Software (Trial Version), Microsoft Windows® 10, Removable Solid State Drive, Commercial NIST Traceable Calibration with Certificate, Power Cable for the Destination Country, Protective Front Cover, 3-year Warranty

#### Included with HDO6000B-MS

16 Channel Digital Leadset, Extra Large Gripper Probe Set (Qty. 22), Ground Extenders (Qty. 20), Flexible Ground Leads (Qty. 5)

Memory Options	
100 Mpts/ch memory Option	HD06KB-L
250 Mpts/ch Memory Option	HD06KB-XL

CPU, Computer, and Other Hardware Options	
Additional Removable Solid State Drive	HD06KB-SSD-02
WaveSource Arbitrary Function Generator	HD06KB-AFG

#### **Serial Trigger and Decode Options**

Senal mggel and Decode Option	15
100Base-T1 Trigger, Decode, Measur and Physical Layer Option	e/Graph, HDO6K-100BASE-T1 TDMP
100Base-T1 Trigger & Decode	HDO6K-100Base-T1bus TD

and Eye Diagram	
LIN Trigger & Decode	HDO6K-LINbus TD
LIN Trigger, Decode, Measure/Graph,	HD06K-LINBUS TDME
and Eye Diagram	
Manchester Decode	HDO6K-Manchesterbus D
MDIO Decode	HDO6K-MDIObus D
NRZ Decode	HDO6K-NRZbus D
PMBus Trigger & Decode	HD06K-PMBUS TD
PMBus Trigger, Decode, Measure/Graph,	HD06K-PMBUS TDME
and Eye Diagram	
SENT Trigger & Decode	HDO6K-SENTbus TD
SENT Trigger, Decode, Measure/Graph,	HDO6K-SENTbus TDME
and Eye Diagram	
SpaceWire Decode	HDO6K-SpaceWirebus D
SPI Bus Trigger and Decode	HD06K-SPIbus TD
SPI Trigger, Decode, Measure/Graph,	HD06K-SPIBUS TDME
and Eye Diagram	
SMBus Trigger & Decode	HD06K-SMBUS TD
SMBus Trigger, Decode, Measure/Graph,	HD06K-SMBUS TDME
and Eye Diagram	
UART and RS-232 Trigger & Decode	HD06K-UART-RS232bus TD
UART-RS232 Trigger, Decode,	HD06K-UART-RS232BUS TDME
Measure/Graph, and Eye Diagram	
USB2-HSIC Decode	HD06K-USB2-HSICbus D
USB 2.0 Trigger and Decode	HD06K-USB2bus TD
USB 2.0 Trigger, Decode, Measure/Graph,	HD06k-USB2BUS TDME
and Eye Diagram	
USB Power Delivery Trigger & Decode	HD06K-USBPD TD
USB Power Delivery Trigger, Decode,	HD06K-USBPD TDME
Measure/Graph, and Eye Diagram	
USB4-SB Trigger, Decode, Measure/Graph,	and HDO6K-USB4SB TDMP
PHY Measurement Optio	

#### **Serial Data Analysis Options**

NRZ Serial Data Analysis Framework,	HD06K-SDAX-NRZ
Eye, Jitter, Noise and Crosstalk Measurements	
PAM Serial Data Expert Analysis Framework,	HD06K-SDAX-PAM
Eye, Jitter and Noise Measurements	
Serial Data Mask Option	HD06K-SDM

**Serial Data Compliance Test Options** 

QualiPHY 10Base-T1L Compliance Software	QPHY-10Base-T1L
QualiPHY 10Base-T1S Compliance Software	QPHY-10Base-T1S
QualiPHY 100Base-T1 Compliance Software	QPHY-100Base-T1
QualiPHY Ethernet 10/100/1000BT Software	QPHY-ENET
QualiPHY MOST50 ePHY Compliance Software	QPHY-MOST50
QualiPHY USB 2.0 Compliance Software for	QPHY-USB
Low Speed and Full Speed data rates

#### **Customer Service**

Teledyne LeCroy oscilloscopes and probes are designed, built, and tested to ensure high reliability. In the unlikely event you experience difficulties, our digital oscilloscopes are fully warranted for three years and our probes are warranted for one year.

This warranty includes:

No charge for return shipping

· Long-term 7-year support

• Upgrade to latest software at no charge

1-800-5-LeCroy teledynelecroy.com Local sales offices are located throughout the world. Visit our website to find the most convenient location.
